Program to Reduce the Use of Paper and Plastic on Campus (Yeditepe University, Turkey)

YEDİTEPE ÜNİVERSİTESİ

Description: Several programs are being used to reduce the use of paper and plastic throughout the campus:

1. In all canteens of Yeditepe university, an application is being launched in parallel with our approach to protect nature. When you bring your own mug or thermos to drink coffee, you get a discount on your shopping. With the application, we will further reduce our waste amount, which is already seriously controlled, and get one step closer to our zero waste targets.
2. A computer program has been supplied for the internal and external correspondences of the university and started to be used efficiently and as a result, excessive paper use has been reduced.
3. Moodle Program used for educational purposes like sending course notes, assignments, etc. have been provided in 2019 and have been used efficiently since then.
4. An inscription to the e-mails sent from Yeditepe University is added to avoid the waste of unnecessary paper consumption for sustainable campus life. The inscription is; **''Please consider the environment before printing. Print black and white and double-sided when possible.''**
5. Recycling boxes have been put in copier rooms to recycle the paper waste produced in the case of getting improper prints and for collecting the paper packages used.
6. It has been aimed to protect nature and increase sensitivity towards nature by using envelopes designed for multiuse which enable for 18 usages for internal correspondence within the university.
7. The students who come to the university for registration and promotion have been provided with environmentally friendly reusable cloth bags which had written and illustrated messages on them to raise environmental awareness.
8. The multifunctional printer devices have been taken out of the offices and reduced in number to limit the total paper use on the campus.
